

Lisse Design Precision Method

For those with curly or wavy hair who want it to be strictly and perfectly smooth.

STEP 1

Shampoo the hair twice with **Deep Cleaning Shampoo**. Massage to create an even lather, then rinse.
Dry the hair completely.

> **TECHNICAL RECOMMENDATION**

If hair is very curly and/or coarse, leave **Deep Cleansing Shampoo** for 5/10 minutes under a heat source.
Then rinse thoroughly.

STEP 2

Divide the hair into 4 sections, or into 6 sections if the hair is very thick.
Wear gloves. Pour 40 ml of **Smoothing Fluid** into a bowl. You can add more product depending on the length, density, and porosity of the hair.

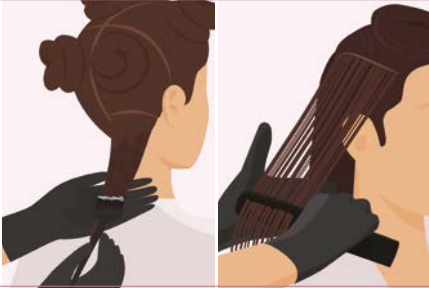

CAN BE MIXED WITH PIGMENTS

STEP 3

Divide the sections into 0.5 cm subsections.
Apply the fluid to the lengths and ends using a brush. Stay 1 cm away from the scalp.
Distribute evenly through the lengths and ends with a fine-tooth comb.
Do not use an excessive amount of product. If the hair feels excessively wet, use the next few sections to absorb the excess product by combing them into the previous ones.

STEP 4

Leave the product to process for 20 minutes at room temperature.

> **TECHNICAL RECOMMENDATION**

If the hair is particularly curly and/or coarse, cover it with a cap and leave under a moderate heat source for 20 minutes. Then remove the cap and leave the hair to cool, at room temperature for 5 minutes.

STEP 5

If the hair is damaged or very porous, apply 3-4 pumps of **Detangling Cream** and comb through to distribute the product evenly through lengths and ends.
Do not rinse, dry thoroughly with hair dryer until the hair is completely dry.

STEP 6

Take 0.5cm sections and flat iron following the directions in the table.
Rinse thoroughly until there is no product residue left in the hair.

TYPE OF HAIR	TEMPERATURE OF FLAT IRON	No of PASSES
Coarse, resistant or natural	392 °F / 200 °C - 410 °F / 210 °C	15 - 18
Normal hair	374 °F / 190 °C – 392 °F / 200 °C	12 - 15
Cosmetically-colored hair	338 °F / 170 °C – 356 °F / 180 °C	10 - 12
Fine, damaged, bleached, natural white, hair that is highlighted more than 75%, cosmetically-colored red hair.	320 °F / 160 °C – 338 °F / 170 °C	6 - 8

STEP 7

Apply **Rehydrating Finishing Mask** to damp hair. Leave for 5 minutes. Rinse.
Blow dry the hair and style as desired.
Flat iron to finish, if required.

CAN BE MIXED WITH PIGMENTS

RECOMMENDED TECHNICAL SERVICES WHILE PERFORMING KERATIN THERAPY SERVICES

4. REFRESH LENGTHS AND ENDS WITH PIGMENTS

Keratin Therapy services can alter the color of both natural and cosmetically colored hair, including grey hair.
We recommend adding the most suitable **Pigments DURING** the keratin Therapy service, following the recommended mixing ratio:

COSMETIC HAIR COLOR MAINTENANCE

SMOOTHING FLUID/EASY LISSE	10:1	40ml Smoothing Fluid/Easy Lisse 4ml of desired Pigments
SMOOTHING CREAM	5:1	40ml Smoothing Cream 8ml Pigments

COOL BLONDE OR GREY HAIR to prevent yellowing

SMOOTHING FLUID/EASY LISSE	8:1	40ml Smoothing Fluid/Easy Lisse 5ml Violet Ash Pigments .2l
SMOOTHING CREAM	4:1	40ml Smoothing Cream 10ml Violet Ash Pigments .2l

WARM BLONDE HAIR to prevent yellowing

SMOOTHING FLUID/EASY LISSE	20:1	40ml Smoothing Fluid/Easy Lisse 2ml Violet Ash Pigments.2l
SMOOTHING CREAM	10:1	40ml Smoothing Cream4ml Violet Ash Pigments .2l

To further revive or neutralize the color, mix **Rehydrating Finishing Mask/ Maintenance Conditioner** or **Liquid Glass Lamellar Water** with the most suitable Pigments, in a 10:1 ratio. Leave for 5- 10 minutes.
It is crucial to pay attention to the temperature of the flat iron during the Keratin Therapy service, as too high a temperature may lighten the color too much and create unwanted tones.

SERVICES THAT CAN BE PERFORMED ON THE SAME DAY

1. REGROWTH COLOR APPLICATION

A regrowth color application with one of our permanent or demi-permanent color lines'. After the color processing is complete, perform two shampoos, using **Deep Cleansing Shampoo** for the second wash.
Then proceed to the desired Keratin Therapy service.

2. COLOR AND TONE WITH COLOR WEAR

Use **Color Wear Cream** or **Color Wear Gloss Toner** immediately after completing the Keratin Therapy service. After the keratin service, wash the hair twice with **Maintenance Shampoo**. Then apply the color to dry or damp hair.

3. FULL HEAD BLEACH/HIGHLIGHTS

Start with the lightening service.
First shampoo: After the lightening process is complete, wash the hair with **Maintenance Shampoo** or the most suitable Semi Di Lino shampoo depending upon the hair type.
Second wash: Use **Deep Cleansing Shampoo**.
Perform the chosen Keratin Therapy treatment.
At the end of the keratin service, wash twice with **Maintenance Shampoo**. *Then tone the hair.

5. COLOR SERVICE

Before applying the color mixture, make sure you have washed the hair twice with **Maintenance Shampoo**.
Apply the desired shade.

6. FULL HEAD BLEACH/HIGHLIGHTS

When performing a full head bleach or highlights after a Keratin Therapy service, it is important to wash the hair at least twice with **Maintenance Shampoo**. After a keratin therapy service, the lightening process will happen more quickly, so it is advisable to perform a strand test. Use 5/10vol. oxidant in the bleach mixture and avoid higher strengths. Finally, complete the service with the desired toner.

1 choose a color one level darker than the desired shade
2 During the second shampoo, shampoo the lengths and ends and use a brush to distribute the shampoo through the hair to ensure that you remove any smoothing product residue.

LISSE DESIGN

Step by Step

ALFAPARF MILANO PROFESSIONAL

Lisse Design Biomimetic Plastia Method
For smooth, velvety, shiny and combable hair.
Fewer steps to save time in the salon.

NEW

STEP 1

Divide dry (unwashed) hair into 4 sections.
Wear gloves.
Pour 80 ml of **Smoothing Cream** into a bowl. You can add more product depending on the length, thickness, and porosity of the hair.

CAN BE MIXED WITH PIGMENTS

STEP 2

Divide the sections into 1-cm wide sub-sections. Apply the product to the lengths and ends using a brush, staying 1cm away from the scalp.
Distribute the product through the hair using a fine-toothed comb.
Cover the hair with a cap and leave for 50 minutes at room temperature or for 30 minutes under a heat source.

STEP 3

Rinse off excess product, moving the hair.
Then comb through with a wide-tooth comb and, if necessary, rinse again until the optimal level of **product residue** is achieved, as shown in the photo.

STEP 4

Blow dry until the hair is 100% dry.
Take 0.5cm sections and flat iron as indicated in the table.

TYPE OF HAIR	TEMPERATURE OF FLAT IRON	No. of PASSES
Coarse, resistant or natural	410 °F / 210 °C – 446° F / 230 °C	18 - 20
Normal hair	374 °F / 190 °C – 410° F / 210 °C	15 - 18
Cosmetically-colored hair	338 °F / 170 °C – 374° F / 190 °C	12 - 14
Fine, damaged, bleached, natural white, hair that is highlighted more than 75%, cosmetically-colored red hair.	320 °F / 160 °C – 338 °F / 170 °C	6 - 8

STEP 5

Rinse thoroughly and shampoo twice with **Maintenance Shampoo**.
Then apply **Liquid Glass Lamellar Water** to damp hair, distributing it section by section with a zigzag movement.
Massage and lather to create a light foam, then comb through and rinse immediately. No processing time is required.
Blow dry the hair to achieve the client's desired style and flat iron, if needed, to finish the look.

> **TECHNICAL RECOMMENDATION**
If the hair is dry and/ or very curly, apply **Keratin Serum** to towel-dried hair.

Biomimetic Lamination Treatment
For soft, shiny hair with maximum vitality

NEW

STEP 1

Shampoo the hair twice with **Deep Cleaning Shampoo**. Massage to create an even lather, then rinse.
Towel-dry the hair to remove excess water.

STEP 2

Wear gloves.
Create a mixture of 2 parts of **Smoothing Cream**, 1 part of **Rehydrating Finishing Mask**, 1 part of **Liquid Glass Lamellar Water** in a bowl.
Example:
+20 ml Smoothing Cream
+10 ml Rehydrating finishing Mask
+10 ml Liquid Glass Lamellar Water

CAN BE MIXED WITH PIGMENTS

STEP 3

Take a section and apply the product mixture through the lengths and ends, staying 1.5 cm away from the scalp. Massage the product through the section and use a comb for an even distribution.

STEP 4

Layer 30 ml of **Liquid Glass Lamellar Water** on top of the product already on the hair, staying 1.5 cm away from the scalp, and massage the product through the lengths to lather.
Cover with a cap and leave under a heat source for 10 minutes.

STEP 5

Rinse thoroughly and blow dry the hair.

STEP 6

Flat iron according to recommendations **in the table**, taking 2 cm sections. Finish the look with a few drops of **Oil**.

HAIR TYPE	TEMPERATURE	No. of PASSES
Natural, coarse and/or very resistant hair	374 °F / 190 °C – 410 °F / 210 °C	3 - 4
Treated and/or fine hair	302 °F / 150 °C – 338 °F / 170 °C	3 - 4

IN-SALON KERATIN MAINTENANCE SERVICE

Keratin Therapy Lisse Design maintenance treatment, designed to prolong the results of technical services. Use **Maintenance Shampoo**, followed by **Maintenance Conditioner** or **Rehydrating Finishing Mask**, now available in back bar formats, or **Liquid Glass Lamellar Water** for a lamination effect. **Keratin Serum** and **The Oil** complete the treatment, providing a flawless, shiny, and protected finish.

Easy Lisse Discipline Treatment
Say goodbye to frizz.

STEP 1

Shampoo the hair twice with **Deep Cleaning Shampoo**. Massage to create an even lather, then rinse.

> **TECHNICAL RECOMMENDATION**
If hair is very curly and/or coarse, leave **Deep Cleaning Shampoo** for 5/10 minutes under a heat source.
Then rinse thoroughly.

STEP 2

Towel-dry the hair.
Divide the hair into 6 sections, or into 8 sections if the hair is very thick.
Wear gloves.
Pour 30 ml to 50 ml of **Easy Lisse Discipline Treatment** into a bowl, depending upon the length of the hair.

CAN BE MIXED WITH PIGMENTS

STEP 3

Take a section and apply the product through lengths and ends. Stay 1 cm away from the scalp. Massage along the entire length of the section and use a comb for a more even distribution.

STEP 4

Cover the hair with a cap and process at room temperature for 20 minutes.
Rinse thoroughly.

> **TECHNICAL RECOMMENDATION**
If the hair is very curly and/or coarse, cover it with a cap and process for 20 minutes under moderate heat source. Then remove the cap and leave the hair at room temperature for 5 minutes.
Rinse thoroughly.

STEP 5

Blow-dry and then flat iron according to the directions given in the table, taking 2 cm sections.

TYPE OF HAIR	TEMPERATURE OF FLAT IRON	No. of PASSES
Natural, coarse and/or very strong	392 °F / 200 °C	6 - 8
Treated and/or fine hair	320 °F / 160 °C	4 - 6

> **TECHNICAL RECOMMENDATION**
If the hair is very curly, apply **Detangling Cream** to towel-dried hair. This will help blow-drying.
